

How Much More Do I Need?

You are short. Work out exactly how much more it takes.

NAME

DATE

You want something, and you do not have enough yet. Take away what you **have** from what it costs.

Price – What you have = How much more

$$\$20.00 - \$14.00 = \$6.00$$

One thing to buy

Take what they have away from the price.

1. Marcus wants the Headphones.

It costs **\$24.95**. Marcus has **\$18.50**.

How much more does Marcus need? \$
